

IS YOUR DRINKING WATER SAFE?

Regular testing of your drinking water is recommended by the Department of Health. This testing should occur at least once a year or when you suspect a problem (staining, smell, odor, etc.)

Helpful contacts at the Rhode Island Health Department:

Division of Drinking Water Quality: (401) 222-6867

Division of Environmental Health Risk Assessment: (401) 222-3424

NETLAB has put together five different packages to choose from. The following packages have been designed to cover a range of water tests and prices. We provide you with the appropriate containers and instructions for sampling. We have a technical staff available for interpretation of results.

IMPORTANT Sampling instructions:

- Please fill sample bottles completely and deliver to the lab the same day as collection.
- First Draw sample is to be taken first thing in the morning, then flush the system for several minutes and take the Second Draw sample.
- The small vials for Volatile Organic Compounds must be completely filled. Cap and invert the vials to ensure there are no air bubbles.

Besides our series of tests, we offer just a bacteria test.

* Total Coliform Bacteria: Price \$30

Sample must be taken in a sterile container. We will provide you with one.

Sampling instructions: Remove aerator from your kitchen faucet and run the cold water for twenty minutes (this step is necessary to purge the holding tank). Fill the sterile container to the 100ml (4 oz.) mark. Do not touch the inside of the container or cover. Your fingers may have bacteria on them.

Keep your sample cool and deliver it to the laboratory no longer than 5 hours after collection and prior to 4:30pm.

If the well has been treated for bacteria then you should wait a week after any treatment (i.e. chlorination). This will allow your system to flush. We cannot test a water sample that contains chlorine.

C-O Series

Price: \$65

Certificate of Occupancy

Bacteriology:*
Total Coliform

Nitrate/Nitrite
Fluoride
Lead

Basic Series

Price: \$95

Bacteriology:*
Total Coliform
E. Coli

Metals:
Iron
Lead
Manganese

Chemistry:
pH
Color
Odor
Turbidity
Nitrate/Nitrite
Sulfate
Chloride

Extended Series

Price: \$160

Bacteriology:*
Total Coliform
E. Coli

Metals:
Copper
Iron
Lead
Manganese
Sodium

Chemistry:
pH
Color
Odor
Turbidity
Total Dissolved Solids
Alkalinity
Fluoride
Hardness
Nitrate/Nitrite
Sulfate
Chloride

Complete Series

Price: \$240

Bacteriology:*

Total Coliform

E. Coli

Metals:

First Draw:

Copper

Lead

Second Draw:

Arsenic

Calcium

Copper
